

The NATIONAL STATISTICAL SERVICE OF GREECE (NSSG) through this issue presents certain general statistical data which depict the current demographic, social and economic situation of Greece. The data published herein are a selection of those available by the end of the first semester 2009.

The general publications of the NSSG are: the STATISTICAL YEARBOOK OF GREECE, the CONCISE STATISTICAL YEARBOOK OF GREECE and the MONTHLY STATISTICAL BULLETIN, which is being updated with the most recent data. Special issues by subject are published as well. We would also like to inform you that the Library Section of the NSSG provides users with data on statistics concerning EU, eurozone members states and other countries.

Apart from the statistical data appearing in the publications, the NSSG provides more recent ones upon request. Besides, users can be provided with data on magnetic means upon settlement of the related invoice.

For the publications, the price-list and any other general information, one should apply to the National Statistical Service of Greece:

Note: Since 2005, according to the national and european legislation, the particulate – matter measurement method has been changed. The method of "black smoke" has been replaced by the gravimetric method for the measurement of particles of less than 10µm diameter.

(1) All the values of pollution are in µg/m³, except from carbon monoxide (CO), the values of which are in mg/m³.

(2) Average 24-hour values resulting from hourly measurements.
